

# Getting Started

You've just installed the [bitvoodoo Enterprise Theme](#) for Atlassian Confluence. But now what? This is a hands-on tutorial that gets you started with the Enterprise Theme in no time.

With a few simple steps, you can transform your on-premise Confluence from okay-looking into a wiki that looks and feels awesome.

## 1

## Enable the Enterprise Theme

First, you need to enable the Enterprise Theme.

1. Click the **cog icon**  at the top right of the screen, then choose **General configuration**.
2. Select **Themes** under **Look and Feel** in the left-hand panel. This will list the currently selected theme and all the other available themes.
3. Select the **Enterprise Theme** and click confirm at the bottom of the list.

## 2

## Choose a Design

Next, you'll have to select an Enterprise Theme design.

1. Click the **cog icon**  at the top right of the screen, then choose **General configuration**.
2. Select **Designs** under **Enterprise Theme** in the left-hand panel. This will list all the available designs. The currently selected design is highlighted.
3. Click the **"Select" button** of the design of your choice. This applies the settings of this design globally.

## Designs

If you select a design, then any colours defined in that design will be applied across the whole Confluence site. Space administrators may select a different theme for their spaces.

**Centered Design**  
A centered design, with a maximal width of 1280px.

Select

**Default Design**  
A light blue design, with a light-toned header

Selected

**Simple Design**  
A more simple design.

Select

**Your CI/CD**

## Configure a Header Menu

Finally, let's add a menu to the header for easy navigation.

Configure the global header menu:

1. Click the **cog icon**  at the top right of the screen, then choose **General configuration**.
2. Select **Menus** under **Enterprise Theme** in the left-hand panel. This will list the two default menus for the header and the footer. It can also contain other menus that have been configured.

Click the **Configure** link for the **Global Header** menu.

### Menus

+ Add Menu

The header area for the menu is only visible, if there are menu entries or the language selector is activated.

Name	Operations
<a href="#">Global Header</a>	<a href="#">Configure</a> · <a href="#">Rename</a>
<a href="#">Global Footer (BV__FOOTER)</a>	<a href="#">Configure</a> · <a href="#">Rename</a>

Start editing your menu.
