

Enterprise Theme REST API

This page tells you, which REST APIs you can use provided by the Enterprise Theme.

On this page:

- [Menu](#)
 - </rest/enterprisetheme/1.0/menu/all.json>
 - </rest/enterprisetheme/1.0/menu/entries.json>
- [Confluence Content Objects](#)
 - <rest/enterprisetheme/1.0/search/pages>
 - <rest/enterprisetheme/1.0/search/blogs>
 - <rest/enterprisetheme/1.0/search/content>
 - <rest/enterprisetheme/1.0/search/groups>
 - <rest/enterprisetheme/1.0/search/users>
- [Atlassian Team Calendars](#)
 - <rest/enterprisetheme/1.0/subcalendars>

Menu

With these endpoints you can retrieve all informations of the configured menu structure.

/rest/enterprisetheme/1.0/menu/all.json

Returns a list of all menus.

200 - application/json

```
[
  {
    "title": "Default Header",
    "id": ""
  },
  {
    "title": "Default Footer",
    "id": "BV__FOOTER"
  }
]
```

/rest/enterprisetheme/1.0/menu/entries.json

Returns all children menu entries of a specific node. If there is no query parameter, the top menu entries of the *Global Header* for the language of the current user is returned.

Parameter	Value
menuidentifier	The Menu identifier
identifier	The identifier of the parent menu entry.

Examples:

/rest/enterprisetheme/1.0/menu/entries.json

200 - application/json

```
[
  {
    "id": "69fd42b9-a0ec-4aec-b9fe-6d8c13216f8c",
    "text": "Example Menu Entry",
    "href": "#",
    "children": 0,
    "className": "LINK"
  },
  {
    "id": "5c3541d0-d8ce-45f6-8152-d4330ed4b710",
    "text": "Submenu",
    "href": "#",
    "children": 3,
    "className": "LINK"
  },
  {
    "id": "12162d70-b006-4e71-a781-9574b00a7f2a",
    "text": "Mega Menu",
    "href": "#",
    "children": 2,
    "className": "LINK"
  }
]
```

/rest/enterprisetHEME/1.0/menu/entries.json?menuIdentifier=BV_FOOTER

200 - application/json

```
[
  {
    "id": "69fd42b9-a0ec-4aec-b9fe-6d8c13216f8c",
    "text": "Example Menu Entry",
    "href": "#",
    "children": 0,
    "className": "LINK"
  },
  {
    "id": "5c3541d0-d8ce-45f6-8152-d4330ed4b710",
    "text": "Submenu",
    "href": "#",
    "children": 3,
    "className": "LINK"
  },
  {
    "id": "12162d70-b006-4e71-a781-9574b00a7f2a",
    "text": "Mega Menu",
    "href": "#",
    "children": 2,
    "className": "LINK"
  }
]
```

/rest/enterprisetHEME/1.0/menu/entries.json?identifier=12162d70-b006-4e71-a781-9574b00a7f2a

200 - application/json

```
[
  {
    "id": "dd313822-4441-4302-b58f-cccf2c481e1f",
    "text": "Submenu 1",
    "href": "#",
    "children": 2,
    "className": "LINK"
  },
  {
    "id": "458e9df7-7803-4e8f-ae0f-d99e72ef99b3",
    "text": "Submenu 2",
    "href": "#",
    "children": 2,
    "className": "LINK"
  }
]
```

Confluence Content Objects

rest/enterprisetheme/1.0/search/pages

Returns a list of pages. This endpoint is used in the Enterprise Theme for autocomplete fields.

Parameter	Value
q	A query term to filter the results
spaceKey	An optional spaceKey, to receive the results for a certain space.

/rest/enterprisetheme/1.0/search/pages?q=w

200 - application/json

```
[
  {
    "id": 98308,
    "name": "_Approvals Workflow",
    "spaceKey": "ds",
    "spaceName": "Demonstration Space",
    "contentType": "page"
  },
  {
    "id": 98334,
    "name": "Welcome to the Confluence Demonstration Space",
    "spaceKey": "ds",
    "spaceName": "Demonstration Space",
    "contentType": "page"
  }
]
```

rest/enterprisetheme/1.0/search/blogs

Returns a list of blogs. This endpoint is used in the Enterprise Theme for autocomplete fields.

Parameter	Value
q	A query term to filter the results.

spaceKey	An optional spaceKey, to receive the results for a certain space.
----------	---

/rest/enterprisetheme/1.0/search/blogs?q=w

200 - application/json

```
[
  {
    "id": 98345,
    "name": "Movember at Atlassian - Oooo we're half way there, oooooo oh...",
    "spaceKey": "ds",
    "spaceName": "Demonstration Space",
    "contentType": "blog"
  }
]
```

rest/enterprisetheme/1.0/search/content

Returns a list of pages. This endpoint is used in the Enterprise Theme for autocomplete fields.

Parameter	Value
q	A query term to filter the results.
spaceKey	An optional spaceKey, to receive the results for a certain space.

/rest/enterprisetheme/1.0/search/content?q=we

200 - application/json

```
[
  {
    "id": 98334,
    "name": "Welcome to the Confluence Demonstration Space",
    "spaceKey": "ds",
    "spaceName": "Demonstration Space",
    "contentType": "page"
  },
  {
    "id": 98345,
    "name": "Movember at Atlassian - Oooo we're half way there, oooooo oh...",
    "spaceKey": "ds",
    "spaceName": "Demonstration Space",
    "contentType": "blog"
  }
]
```

rest/enterprisetheme/1.0/search/groups

Returns a list of groups. This endpoint is used in the Enterprise Theme for autocomplete fields.

Parameter	Value
q	A query term to filter the results.

/rest/enterprisetheme/1.0/search/groups?q=ad

200 - application/json

```
[
  {
    "id": "confluence-administrators",
    "name": "confluence-administrators"
  }
]
```

rest/enterprisetheme/1.0/search/users

Returns a list of users. This endpoint is used in the Enterprise Theme for autocomplete fields.

Parameter	Value
q	A query term to filter the results.

/rest/enterprisetheme/1.0/search/users?q=ad

200 - application/json

```
[
  {
    "id": "admin",
    "name": "admin"
  }
]
```

Atlassian Team Calendars

rest/enterprisetheme/1.0/subcalendars

Returns a list of all subcalendars of the [Atlassian Team Calendars](#) add-on.

The response returns the current installed version of the Atlassian Team Calendars add-on and a boolean value, if the current Enterprise Theme is compatible with this version.

/rest/enterprisetheme/1.0/subcalendars.json

200 - application/json

```
{
  "subcalendars": {
    "76d8b02e-e4fb-4217-8283-63962a23e590": {
      "title": "Reise",
      "id": "76d8b02e-e4fb-4217-8283-63962a23e590",
      "eventType": "travel",
      "colour": "subcalendar-yellow",
      "description": "",
      "icon": "/download/resources/com.atlassian.confluence.extra.team-calendars:calendar-resources/img/travel_12.png",
