

# Advanced Settings

How to configure the advanced settings of the Enterprise Theme.

The Advanced Settings allow you to further customize the behaviour of the Enterprise Theme, next to [designs](#) or [menus](#).

## On this page:

- [Global Advanced Settings](#)
  - [Site Configurations](#)
  - [Language selector](#)
- [Space Advanced Settings](#)
  - [Why create a space specific configuration?](#)
  - [Configure space specific advanced settings](#)
  - [Reset space specific settings and use the global settings](#)

## Global Advanced Settings

1. Choose the **cog icon**  at the top right of the Confluence screen, then choose **General configuration**.
2. Select **Advanced Settings** under **Enterprise Theme** in the left-hand panel.

### Advanced Settings

This is the global Enterprise Theme Configuration. All these configurations can be overwritten in every single space.

#### Site Configuration

- Use site logo in header**  
If enabled, the site logo is used in the header in every space and is linked to the dashboard. If disabled and there is a space logo defined, the current spaces logo is used and is linked to the homepage of the current space.
- Show link to people directory for anonymous users**  
If enabled, the people directory link is shown for anonymous users too.
- Show language selector**  
If enabled, the language selector in the top right corner of the menu is displayed.
- Show minimize buttons of panelboxes**  
If enabled, the min/max buttons of titled panelboxes are displayed.
- Minimize comments**  
If enabled, the comment box is minimized by default, as long as there are no comments on the page.
- Minimize labels**  
If enabled, the label box is minimized by default.
- Minimize attachments**  
If enabled, the attachment box is minimized by default.

Save

#### Installed Languages

In this section you can choose which languages should be available in your Confluence instance and used in the language switcher. Please note, that english is not listed, because english is the system language and cant be disabled.

French (France)		Disable
Japanese (Japan)	DISABLED	Enable
Spanish (Spain)	DISABLED	Enable
German (Germany)		Disable

## Site Configurations

These configurations can be set globally for the Enterprise Theme, but also can be overwritten in each space.

<b>Use site logo in header</b>	<ul style="list-style-type: none"> <li>If enabled, the site logo is used in the header in every space and is an active link to the dashboard.</li> <li>If disabled, and a space logo is defined, the current space's logo is used and is linked to the homepage of the current space.</li> </ul> <p>Visit the page <a href="#">Header Logo</a> to find more information about the header logo and its behaviour.</p>
<b>Show link to people directory for anonymous users</b>	If enabled, the people directory link is shown for anonymous users too.
<b>Show language selector</b>	<p>If enabled, the language selector in the top right corner of the menu is displayed.</p> 
<b>Show minimize buttons of panel boxes</b>	<p>If enabled, the min/max buttons of titled panel boxes are displayed.</p> 
<b>Minimize comments</b>	If enabled, the comment box is minimized by default, as long as there are no comments on the page.
<b>Minimize labels</b>	If enabled, the label box is minimized by default.
<b>Minimize attachments</b>	If enabled, the attachment box is minimized by default.

## Language selector

You can configure which languages are available in your Confluence and used in the Enterprise Theme language switcher.

Please note, that English is not listed, because English is the system language and can't be disabled. The [default language you choose](#) for your Confluence instance also cannot be disabled.

### Installed Languages

In this section you can choose which languages should be available in your Confluence instance and used in the language switcher. Please note, that english is not listed, because english is the system language and cant be disabled.

French (France)		Disable
Japanese (Japan)	DISABLED	Enable
Spanish (Spain)	DISABLED	Enable
German (Germany)		Disable

Note: If you disable a language, you disable this language for the whole Confluence instance.

## Space Advanced Settings

By default, the Enterprise Theme uses the globally defined Advanced Settings for all spaces. If you like, you can overwrite the global settings in a space.

### Why create a space specific configuration?

There are some use cases where it's useful to define a space specific configuration. The most common one: You would like to display the current space's logo as the header logo when a user is navigating in that space.

### Configure space specific advanced settings

1. Visit the [Space Administration](#)
2. If the Enterprise Theme is enabled for this space, you can select **Advanced Settings** under **Enterprise Theme** in the left-hand panel.

## Inherit Space Configuration

The configurations are inherit by the global Enterprise Theme configuration. You can edit them here and create space specific configurations.

- Use site logo in header  
If enabled, the site logo is used in the header in every space and is linked to the dashboard. If disabled and there is a space logo defined, the current spaces logo is used and is linked to the homepage of the current space.
- Show link to people directory for anonymous users  
If enabled, the people directoy link is shown for anonymous users too.
- Show language selector  
If enabled, the language selector in the top right corner of the menu is displayed.
- Show minimize buttons of panelboxes  
If enabled, the min/max buttons of titled panelboxes are displayed.
- Minimize comments  
If enabled, the comment box is minimized by default, as long as there are no comments on the page.
- Minimize labels  
If enabled, the label box is minimized by default.
- Minimize attachments  
If enabled, the attachment box is minimized by default.

3. Click **Edit**, make your changes and click the **Save** button.

## Space Configuration

This configuration belongs only to this space and overwrites the default theme configuration done in the Confluence Admin.

- Use site logo in header  
If enabled, the site logo is used in the header in every space and is linked to the dashboard. If disabled and there is a space logo defined, the current spaces logo is used and is linked to the homepage of the current space.
- Show link to people directory for anonymous users  
If enabled, the people directoy link is shown for anonymous users too.
- Show language selector  
If enabled, the language selector in the top right corner of the menu is displayed.
- Show minimize buttons of panelboxes  
If enabled, the min/max buttons of titled panelboxes are displayed.
- Minimize comments  
If enabled, the comment box is minimized by default, as long as there are no comments on the page.
- Minimize labels  
If enabled, the label box is minimized by default.
- Minimize attachments  
If enabled, the attachment box is minimized by default.

Once you've configured space specific advanced settings, changes to the global settings won't count for this space anymore.

## Reset space specific settings and use the global settings

To revert to the global settings, just click on **Reset Default**. Any space specific settings will be removed, and the global settings will be applied again.
